IDEMIA's Automated Fingerprint Identification System (AFIS) is currently installed at Florida Department of Law Enforcement (FDLE). IDEMIA is the owner of the software and design, sole developer and sole provider for the AFIS.

The proposed IDEMIA LiveScan Fingerprint System is specifically designed to work with the existing AFIS located at FDLE.

As the manufacturer of the existing FDLE AFIS and software application, only IDEMIA can provide the LiveScan System that uses the same Software processing, searching and matching technology used by the FDLE AFIS. These devices use a proprietary software application that incorporates specific encoding algorithms and search routines developed and patented by IDEMIA.

IDEMIA's LiveScan Systems are highly specialized and include IDEMIA proprietary hardware designs with proprietary application and customized LiveScan Software. Additionally, several components of the LiveScan System include IDEMIA patented technology.

Due to the proprietary nature of the design as well as IDEMIA's exclusive ownership of the source materials, the hardware and software as well as the functionality of the LiveScan System can be provided and supported only by IDEMIA.

Specifically:

IDEMIA does not have other sales channels, partners or resellers. The proposed solution (hardware, software, and support) can only be procured and implemented directly from IDEMIA.
