ACKNOWLEDGEMENTS

The City of Cocoa Parks and Recreation Master Plan Draft was produced by S&ME under contract with the City of Cocoa. The plan was created with input from City staff and a volunteer steering committee and was a very high-level and long-term plan for city parks. City staff, in coordination with Brevard County Parks and Recreation and the various end-users of the parks, produced the District 4 Parks Infrastructure Plan to address the immediate needs of the City parks.

Summary

Overview

In 2020, the City of Cocoa embarked on a Parks and Recreation Master Plan to help evaluate and provide recommendations for future improvements around various parks within the City of Cocoa. This plan was created through a consultant with input from City Staff and a volunteer steering committee and was a very high level and long-term plan for city parks. This master plan provided useful information related to the connectivity, canopy, additional park areas, and inventory.

In order to address the more immediate needs of the parks, City Staff worked with Brevard County Parks and Recreation and the various end-users of the parks. Walkthroughs were performed of each park and it was determined that many of the parks within the City are lacking the basic essential amenities that are common to most parks.

This plan covers what was identified as long-term needs for certain parks along with the more immediate concerns found in the infrastructure plan conducted by staff to create an overall Parks Infrastructure and Master Plan.

Recreation Area

Subsequent to the formation of this district, the City of Cocoa entered into a long-term maintenance and operations agreement with Brevard County Parks and Recreation. This agreement was established in April 1986 and expired in April 2011. The City of Cocoa and County have continued to operate under this agreement to continue the maintenance and operations of the District Four parks within the City of Cocoa. The City of Cocoa and Brevard County are currently negotiating a new interlocal agreement to address the maintenance and operations of these parks.

History of District 4

Recreation Area (cont.)

1962

Election held to approve the formation of District 4 Parks

1986

Long-term Maintenance Agreement established with Brevard County Parks

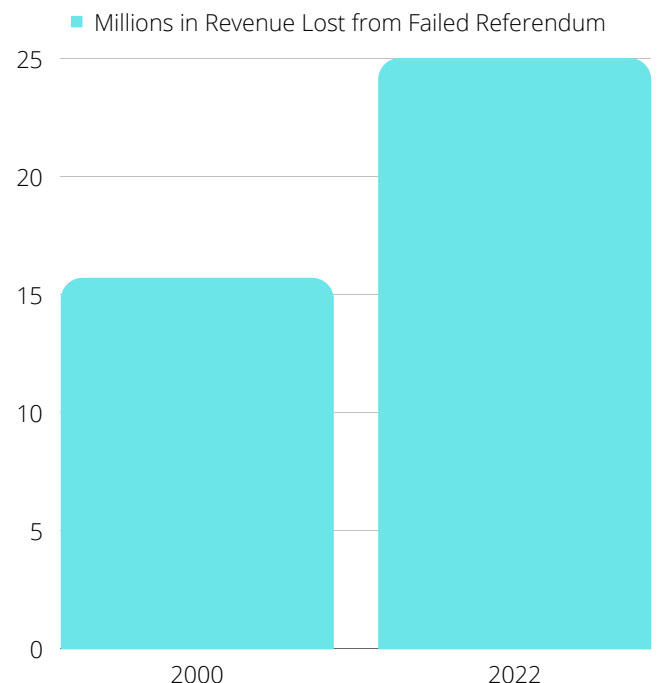

2000

Referendum placed on the ballot to close funding gap for parks

2011

Long-term Maintenance expired but the County and City continue to operate under the agreement

In the late 1990s, it was determined that there was a lack of funding related to the maintenance, operations, and capital improvements of these parks. In an effort to close this funding gap, a referendum was placed on the ballot in 2000. Unfortunately, while a similar referendum passed in other districts of the County, it failed in District Four. The failed referendum equated to an immediate loss of approximately \$15.7 million. In 2022, that would equate to about \$25 million with inflationary adjustments. The referendum would have also provided more funding for staffing and general maintenance of these facilities.

Community Stakeholders

Both the Master Plan and Infrastructure Plan involved input from community stakeholders that helped to guide information adopted in this plan.

Residents, Business Owners

During the development of the Master Plan, residents and business owners were involved with virtual public meetings, stakeholder interviews and an online survey.

Master Plan Steering Committee

The Master Plan Steering Committee was made up of City staff, one member of City Council, residents, business owners and current and former Brevard County Parks and Recreation Directors.

Park End-users

The Park Infrastructure Plan meet with park end-users such as the athletic leagues that are paying to rent fields and facilities for practices and games. These represent the majority of the users of the City parks and facilities.

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

BRACCO STORMWATER PARK

Bracco Stormwater Park is a 59.3 acre regional stormwater facility surrounded by a walking path, benches and trees. The park serves as a neighborhood park to the surrounding neighborhoods and has three access points and parking areas.

Benches

Bike Racks

Trail

Dog Waste Stations

Recommendations

- Exercise Equipment
- Canopy Trees
- Signage for named walking routes
- General site lighting around walking paths
- Vinyl coated perimeter fencing
- Floating Wetlands
- Wildlife viewing areas providing better access to the ponds

BREVARD MUSEUM

The Brevard Museum is roughly 3.23 acres and contains meeting space, staff areas and several exhibit rooms with exhibits related to Florida and Brevard County's natural history. The Johnny Johnson Nature Trails surround the facility. The facility is approximately 14,750 sq ft.

Recommendations

- General site improvements to enhance curb appeal
- Parking lot improvements such as resurfacing and restriping
- Exterior and interior facility improvements to modernize appearance, address code, ADA, and life safety issues with an older building

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

CARL E. ANDERSON PARK

A neighborhood park (about .92 acres) that serves as an active space for surrounding residents and provides open green space, a playground, a swing set, pavilion, and a basketball court.

Benches

Playground

Pavilion

Basketball Court

Recommendations

- Restroom facility
- Resurface basketball court
- Replace basketball hoops
- Replace picnic tables
- Parking lot maintenance including striping
- Connections to surrounding parks
- Additional Pedestrian Crossings for visitors to access site safely
- Additional lighting to increase visibility

CARMALT PARK

Pocket park that is located along Forrest Avenue and Carmalt Street. The park has a large canopy of trees and sidewalks.

Recommendations

- Additional Seating
- Additional Lighting along the path
- Safety signage for pedestrians and cyclists
- Signage about surrounding ecosystems

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

CIRCLE PARK

Pocket park in the neighborhood along Circle Drive. The park has an abundance of trees and some seating. Predominately utilized by the surrounding neighborhood.

Recommendations

- Additional seating
- Plant identification signage

COCOA CIVIC CENTER

Approximately 16,000 sq ft facility located in Cocoa Village. The building contains meeting rooms, a main lobby, a large gathering space, and a small kitchen area. It is utilized mainly for special events such as weddings, birthday parties and graduations.

Recommendations

- Interior and Exterior Modernization
- New roof
- New HVAC system

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

COCOA CONSERVATION AREA

A regional park (roughly 394.99 acres) that preserves the natural open space within the City of Cocoa's development area. The main entrance is through the Cocoa Bay Subdivision. There are a number of different species of trees and wetlands with trails winding through.

Picnic
Benches

Pavilion

Trails

Restroom Facilities

Recommendations

- Addition of user-oriented outdoor recreation facilities (children's play area, tennis court, basketball court, volleyball court)
- Partner or contract with local environmental groups to perform nature classes or programs
- Budget for an environmental consultant to evaluate and perform the management of tree communities
- Budget to hire a consultant to implement a prescribed burn plan
- Work with Brevard County for use of Mud Lake for regional flood mitigation and establish trail around the lake
- Budget for a consultant to establish a program to monitor and control invasive vegetation
- Establish a pedestrian and bicycle access point within the access easement on SR524
- Establish a vehicular access point on Cox Rd that can include pedestrian and bicycle amenities
- Educational Signage
- Trailhead signage
- Cohesive signage throughout the park
- Trail connection/crossing in NW to Junny Rios Martinez Park
- Plant identification signage

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

COCOA MANOR/AUTUMN MARIE PARK

Two connecting neighborhood parks located along Coquina Drive and Broadview Drive respectively. Both parks are approximately .45 acres.

Benches/

Picnic

Benches

Pavilion

Playground

Recommendations

- Installation of a walkway from Coquina Drive to Broadview Drive through the parks to provide connectivity
- Replacement of fencing with vinyl coated fence
- Routine upkeep of existing amenities
- Install edging material around playground mulch
- Updated lighting

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

DON "MO" STRADLEY MEMORIAL PARK

A regional sports park with baseball and softball fields and a football field. The park includes a concession stand building with a commentator box between the baseball and softball fields. There is also a commentator box near the football field.

Recommendations

- Concrete walkways to allow for interconnectivity and ADA accommodations
- General stormwater drainage improvements
- Convert septic system to sanitary sewer to prevent routine maintenance of the outdated septic system
- Update field lighting to LED fixtures
- Renovate football field due to drainage issues
- Renovate or replace football concession and scoring building to also include additional restroom facility
- Football field player benches need to be updated
- Update field goal post with netting to keep the ball in the field area
- Upgrade football parking area to asphalt pavement
- Baseball/softball field irrigation and sodding improvements
- Removal of cypress knees in the tee-ball field
- Convert the one softball field in the baseball field cluster back to a baseball field to equal the number of fields
- Backstops at baseball/softball fields reworked and foul ball netting replaced or installed
- Renovate or replace aging baseball./softball concession and scoring building
- Replace softball field bleachers
- Scoreboards and dugouts replaced
- Installation of regulation pitching mounds on softball fields
- Cohesive wayfinding signage/branding
- Updated paint on the dugouts
- Additional tree canopies
- Additional pedestrian crossings and connectivity in surrounding neighborhoods
- ADA compliant handicapped spots
- Additional pathway and parking lot lighting

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

DR. JOE LEE SMITH COMMUNITY CENTER/PARK

Park (approximately 3.2 acres) and community center located in the Diamond Square community. Brand new community center was built in 2020 and the old center is being repurposed for use by a local non-profit agency. Community center has meeting rooms, an indoor basketball/volleyball/pickleball court.

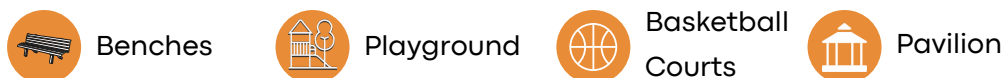

Recommendations

- Re-purpose old community center
- Lifeguard program to recruit lifeguards and expand use of swimming pool
- General upkeep
- Additional lighting

GILMORE COMMUNITY PARK

Neighborhood park (approximately 1.12 acres) located at the intersection of Fern and Prospect Avenues that features a picnic pavilion, playground, small trail, parking lot, and basketball court. The park also features a small green space that could accommodate small events.

Recommendations

- Restroom facility is needed
- Replacement of picnic tables
- General parking lot maintenance including striping
- Community garden
- Additional pedestrian crossings for neighborhood visitors
- Additional shade canopy and more seating options

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

HELOW PARK

A small pocket park at the intersection of N. Fiske Blvd. and Dixon Blvd. that serves as a landscaped cut-through for pedestrians.

Recommendations

- Additional, more visible signage
- Additional landscaping, especially near the road

JOHNNY JOHNSON NATURE TRAILS

Roughly 16.8 acres of nature trails located between Travis Park and the Brevard Museum. Access to the trails are provided through both Travis Park and the Brevard Museum.

Trails

Recommendations

- General wayfinding signage with trail maps
- Replacement of the boardwalk with recycled plastic planks to help increase the life span
- Access control of the trail system should be included with the lease of the Brevard Museum

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

JUNNY RIOS MARTINEZ PARK

A neighborhood park (roughly 5.96 acres) located off of State Road 524 at the entrance of the Cocoa North neighborhood. The park includes tennis courts, basketball court, pavilions, walking trail, retention area, playground, and parking.

Tennis
Courts

Playground

Basketball
Courts

Pavilions

Restroom Facilities

Recommendations

- Installation of a splash pad near the playground area
- Installation of an additional pavilion near the splash pad
- Resurface the tennis and basketball courts and replace nets and basketball hoop
- General restroom renovations to modernize the fixtures
- General parking lot maintenance including restriping
- Crosswalk incorporated across SR 524 for future connection to the Cocoa Conservation Area

LEE WENNER PARK

A riverfront park located at the base of the Hubert Humphrey Causeway. Includes a boat ramp, pavilion, restroom facility, and a large trail that hugs the coastline. The bike/pedestrian path gives visitors and patrons another way to cross the Causeway to the Cocoa Village Marina. Large parking area has space for cars and boat trailers. Park can host events.

Trails

Bike Racks

Pavilions

Restroom Facilities

Recommendations

- Dredging of boat ramp basin
- Implement Brevard Zoo Living Shoreline Program
- Replacement of old fishing pier
- Update Waterfront Master Plan
- Additional lighting throughout park and trail
- Safety signage along trail
- Interpretive signage about ecosystems

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

LEON AND JEWEL COLLINS MUSEUM OF AFRICAN AMERICAN HISTORY AND CULTURE AT THE HARRY T. MOORE CENTER

Located at the historic Harry T. Moore Center this museum located on roughly 1.38 acres along Blake Avenue in the Diamond Square Community. The museum will house information, artifacts and history of African Americans in the Cocoa community. The museum fills half of the historic Harry T. Moore Center and the other half is utilized by the Cocoa PAL program.

Playground

Recommendations

- Seek a non-profit partner to supply relevant exhibits and artifacts as well as maintain and operate the museum on behalf of the City as it has been sitting empty since 2017
- Upgrade or remove playground
- Parking lot improvements including resurfacing and restriping

MYRT THARPE SQUARE

A small public space located in downtown Cocoa Village surrounded by businesses. There is a large pavilion in the center of the space with tree planters and seating surrounding it.

Benches

Bike Racks

Pavilions

Dog Waste Stations

Recommendations

- Additional lighting
- Renovated amenities such as the Gazebo
- Cocoa branded signage that shows it is an entrance to the Village

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

OTHA SCARBOROUGH PARK

A pocket park located along First Street that features stormwater basins with landscaping.

Recommendations

- Added signage so passerbys realize a park is nearby

PEACHTREE PARK

A pocket park located at the intersection of Peachtree Street and Forrest Avenue that features a pathway with brick detail and green space.

Recommendations

- Clearly marked pedestrian crossings
- Additional seating opportunities
- Additional lighting

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

PROVOST PARK

An expansive park (roughly 20 acres) located along Fiske Blvd. just south of SR 520 and next to the Space Coast Area Transit hub. There are a number of athletic fields, pavilions, basketball and tennis courts and a baseball field. The Cocoa Police Community Relations team and Code Enforcement Division is also located in the small office building on the grounds of the park.

Playground

Basketball
Courts

Pavilions

Tennis Courts

Recommendations

- Remove the standalone basketball court and convert to green space or restripe for a pickle ball court
- Resurface the existing basketball court and convert the existing tennis court to a basketball court
- Install new basketball hoops
- Convert the baseball/softball field into a multi-use athletic field with lighting
- Restroom improvements
- Perimeter fencing
- Complete the design and construction of the South Fiske Blvd. parking lot
- Incorporate sidewalks or paths interior to the park
- Replace the existing goal posts at the rugby field and incorporate netting
- Incorporate team benches at all of the fields to allow for tournaments to be held
- Improved lighting including pathway lighting
- Update existing signage
- Add seating areas especially around the playground
- Add pedestrian crossings from the surrounding neighborhoods

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

RIVERFRONT AND TAYLOR PARK

A large open park and playground area (roughly 4.06 acres) along the Riverfront in Cocoa Village. There is an amphitheater stage, large grass area, sand volleyball court, a splash pad, restroom facilities and a playground area. This park is utilized for many special events throughout the year.

Playground

Restrooms

Amphitheater

Sand
Volleyball
Court

Dog Waste
Stations

Recommendations

- Additional beach volleyball court
- Playground replacement in next 5 years
- Improvements to stage technology to accommodate bands and events on the amphitheater stage
- Incorporation of various stormwater improvements to improve water quality of the Indian River Lagoon
- General upkeep
- Additional lighting around seating alcoves

THOMAS COLE STORMWATER RECREATION AREA

A small neighborhood park behind Emma Jewel Charter Academy in the Diamond Square Community. It is home to a stormwater pond with a paved walking path surrounding it.

Trail

Recommendations

- Addition of fitness equipment around the trail
- Addition of trees for shade, trash receptacles and benches

Parks

Below is a listing of each of the parks in the Cocoa community. The listing includes short-term, immediate needs for some of the parks and more long-term plans identified in the Master Plan.

TRAVIS PARK

A neighborhood park and community center (roughly 2.5 acres) that includes a playground, half-court basketball court, and two sand volleyball courts in the north area of Cocoa.

Community
Center

Playground

Restrooms

Pavilion

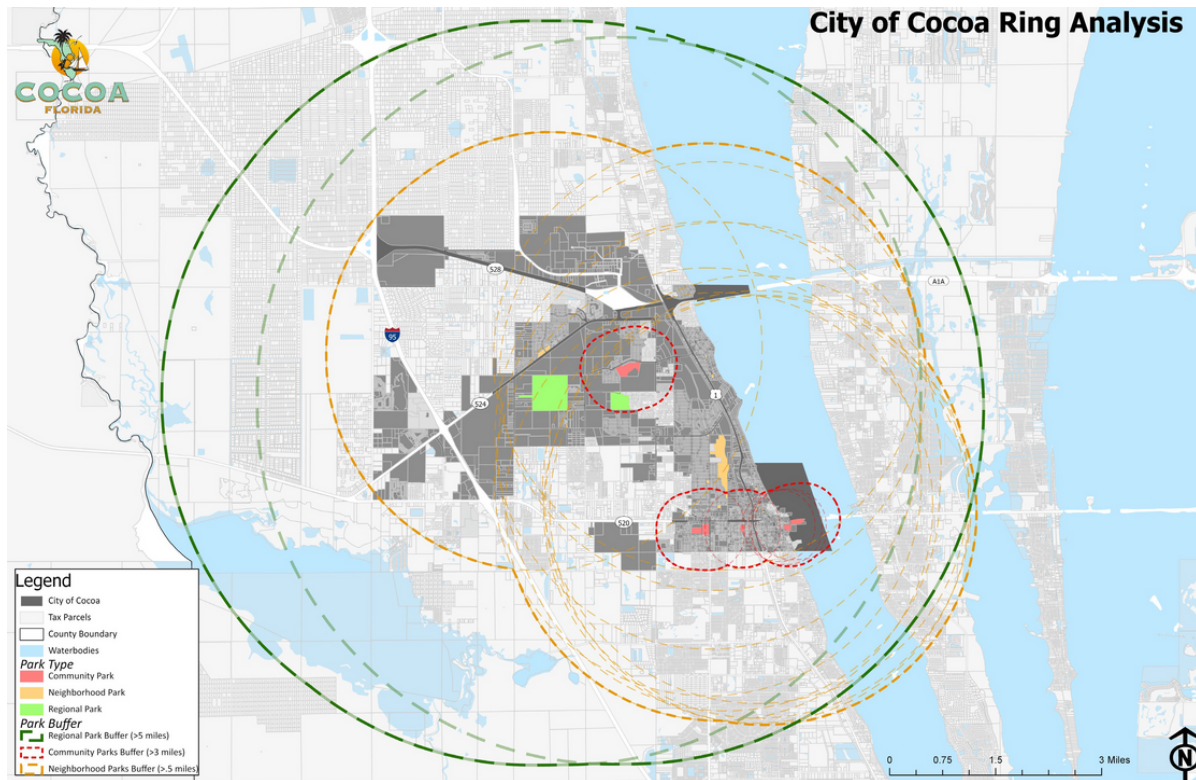

Sand Volleyball
Court

Recommendations

- General interior improvements to Community Center to modernize restrooms, concession and common areas
- LED conversions to all lighting to reduce power consumption
- Addition of one more sand volleyball court to allow for tournaments
- Convert lighting on sand volleyball court to a timed system to extend use of courts
- General maintenance of the parking lot including restriping of the parking stalls
- Additional lighting and security cameras in the parking lot
- Update existing signage
- Additional pedestrian crossings
- Additional seating opportunities

Cocoa Park System Map

The Cocoa Parks system was divided up into three categories of parks to assess their level of service.

- Neighborhood parks serve residents within a half-mile radius surrounding the park. It typically takes a ten-minute walk or a 5-minute bike ride to get to these facilities.
- Community parks serve residents within a three to five-mile radius.
- Regional parks serve a five to ten-mile radius and pull residents to their facilities by having amenities such as large sports fields or indoor recreation areas.

Summary

In summary, a number of general infrastructure needs should be implemented first across these parks as funding allows. The failed referendum in the early 2000s prevented the District's ability to adequately fund various essential needs at the Recreation District Four Parks. A new referendum or strategic funding strategy could be implemented to help fund the critical needs of the District Four Parks, as the costs of general maintenance, operation, and capital improvements will continue to increase. Without increases in funding, the City will continue to see the continued deterioration of these parks' level of service.

A Parks Impact Fee is an option to generate revenue for capital repairs and improvements at parks. This would help to create funding for capital repairs and improvements at both District Four and Municipal Parks. A one-time flat fee would be established and levied on each new dwelling unit being constructed within the City.

The City of Cocoa is in a unique position being a relatively small City and having 18 parks and facilities within its limits. Some of these facilities, in terms of parks, are more complex than a standard neighborhood park. These parks have a broad range of activities that make the various needs difficult to fund and prioritize. The City should determine which amenities or types of parks should be the primary focus to help strategize those priorities. As part of this process, funding the parks in the most need should be the primary focus, followed by park usage.

The City should continue its partnership with the County for District Four Parks Operation and Maintenance. In an effort to help enhance these parks, capital funding from the City budget can help supplement specific parks and endeavors the City may want to pursue. Establishing strong partnerships with non-profits, other governmental agencies, and volunteer groups would help to reduce the burden on City Staff for the operation and maintenance of some of these facilities as well.

Summary (cont.)

The Parks Master Plan also included a number of recommendations for the future of parks in Cocoa.

- It analyzed the levels of service of Cocoa Parks. It shows that the City of Cocoa currently has 1.25 acres per 1,000 people in the City. The study suggests increasing the parks to 4 acres per 1,000 residents in 5 year increments.
- It also stated that the City may want to consider creating consistency in regards to open space standards in the land development code to allow for more open space for recreational purposes.
- Create a park system that increases access to public green space close to residences within a 10-minute walk. An effort is underway by hundreds of Mayors across the United States to commit to developing a parks system that provides parks within a 10-minute walk to everyone within their city. Grants may be available to assist with planning efforts to help increase access to public green space.
- Look into connecting trails between public parks such as Cocoa Conservation Area, Bracco Park, along the Indian River and along SR 524 and regionally.
- Create a clear and cohesive family of signs at all city parks.
- Increase focus on site security and visibility at all city parks.
- Introduce skate parks and dog parks into the City parks system.
- Increase the number of parks and trails especially in the northwest sections of the city.
- Increase shade canopies at all parks.
- Make sure parks serve all residents, not just the younger residents.
- Highlight the Indian River Lagoon.
- Stormwater management facilities should be used as amenity spaces with multi-use recreational opportunities.
- Establish a parks and recreation department.
- Prepare a user fee study for use of park spaces to establish a more equitable fee structure.

Summary (cont.)

The Parks Master Plan also included a number of possible grant opportunities that could serve as an additional revenue source to complete some of the needed upgrades to the parks: (Sources NRPA and FDEP)

- Florida Communities Trust (FCT): Florida Communities Trust (FCT) administers two competitive grant programs funded through the Florida Forever Program. The Parks and Open Space Program and Working Waterfronts Program provide state funds to local governments and nonprofit organizations for land acquisitions. FCT assists communities in protecting important natural resources, providing recreational opportunities and preserving Florida's traditional working waterfronts through the competitive criteria in the Parks and Open Space Florida Forever Grant Program and the Stan Mayfield Working Waterfronts Florida Forever Grant Program. These local land acquisition grant programs provide funding to local governments and eligible nonprofit organizations to acquire land for parks, open space, greenways and projects supporting Florida's seafood harvesting and aquaculture industries. The source of funding for Florida Communities Trust comes from Florida Forever proceeds.
- Florida Recreation Development Assistance Program (FRDAP): FRDAP is a competitive grant program that provides state funds for the acquisition or development of lands for public outdoor recreational use. All county governments and incorporated municipalities of the state of Florida and other legally constituted local governmental entities with the legal responsibility for the provision of outdoor recreational sites and facilities for the use and benefit of the general public.
- Land and Water Conservation Fund (LWCF): The Land and Recreation Grants staff administers grants to local governments through the Land and Water Conservation Fund (LWCF). The LWCF is a federal competitive program that provides grants for acquisition or development of land for public outdoor recreation. Eligible participants include all county governments, municipalities in Florida and other legally constituted local governmental entities

Summary (cont.)

- with the responsibility for providing outdoor recreational sites and facilities for the general public.
- Recreational Trails Program (RTP): The RTP is a competitive grant program for projects that provide, renovate or maintain motorized and nonmotorized recreational trails, trail heads and trailside facilities. The Recreational Trails Program is a federally funded competitive grant program that provides financial assistance to agencies of city, county, state or federal governments, and organizations, approved by the state, or state and federally recognized Indian tribal governments, for the development of recreational trails, trailheads and trailside facilities. The program has been shifted from the Office of Greenways and Trails to DEP's Land and Recreation Grants Section within the Division of State Lands.
- NEW Grant Opportunity Coming March 1: NRPA, is excited to announce funding and coaching to advance community-driven, systems-level strategies for equitable park access that improves the resilience and health of communities. Funding will support projects that advance community-driven, systems-level strategies for equitable park access that improve the environmental resilience and health of communities. The grant program will support park and recreation professionals in partnership with leaders from community-based organizations. Projects should address system-wide park access planning, data collection/analysis, policies and/or capital improvements with a focus on creating climate-ready parks. NRPA will fund 6-10 communities at \$300,000 to \$500,000 each for a total of 2.5 years. Applications open March 1.
- VA Adaptive Sports Grant: The United States Department of Veterans Affairs (VA) will provide up to \$16 million for adaptive sports activities for veterans and members of the armed forces with disabilities. Up to \$1.5 million will be awarded for proposals providing equine therapy targeted for veterans and members of the armed forces with disabilities related to mental health issues. VA awards

Summary (cont.)

- grants to qualifying organizations to plan, develop, manage and implement programs to provide adaptive sports, provider training and other opportunities for veterans and members of the armed forces. With the use of these grants, VA is helping community organizations promote community reintegration through sports.
- Thriving Cities Challenge: The Salazar Center's Thriving Cities Challenge will identify and support breakthrough projects that use innovative nature-based solutions to advance climate resilience, advance racial equity, and strengthen cities and urban communities. Eligible applications must include at least one 501(c)(3) nonprofit and at least one organization that is (or its governing board represented in the project team) led by a Black, Indigenous, or other Person(s) of Color. Projects must be innovative, place-based, and community led, and must focus on building capacity and scaling impact. Five finalists will be selected for additional support to refine and pitch their idea, and one winning team will receive a \$50,000 prize. An optional webinar will be held on March 15. Applications are due April 15.
- RePlay Grant Program: ESPN and the Local Initiatives Support Corporation (LISC) are offering Planning Grants and Implementation Grants to revitalize vacant lots into places for sports, recreation and play. Local community-based groups and other qualified organizations are eligible to apply for funding and technical assistance for early stage projects, support of capital improvements, and to close funding gaps for projects that are in the implementation phase of projects.
- Waste Management Charitable Giving: Waste Management offers charitable gifts to promote civic pride, economic development and revitalization. Waste Management primarily supports environmental initiatives, including promoting parklands and green spaces for people to enjoy and play, and environmental education initiatives targeted at middle and high school students. Eligible entities include 501(c)(3) nonprofit organizations and public organizations. Applications are accepted on an ongoing basis.

Summary (cont.)

- The Fruit Tree Planting Foundation Grant Program: Municipal entities, local nonprofits and public schools are eligible to apply to support the planting of fruitful trees and plants to alleviate hunger, combat global warming, strengthen communities and improve the surrounding environment. Trees can be planted at community gardens, city and state parks, low income neighborhoods, Native American reservations, schools, and other locations where they will serve the greater community. The Foundation provides high-quality trees and shrubs, equipment, on-site orchard design expertise and oversight, horticultural workshops, and aftercare training and manuals.
- Baseball Tomorrow Fund/Major League Baseball Field Maintenance Education Program: This program provides the opportunity for Major League Baseball groundskeepers to share tips and techniques with other professional sports turf managers, coaches, parents and volunteers who are involved in the maintenance of youth baseball and softball fields. In conjunction with the clinics, the Baseball Tomorrow Fund awards a \$10,000 grant to a local organization selected by the participating club. The grant funds are used for the purchase of field maintenance supplies, equipment or services.
- Keep America Beautiful's Community Restoration and Resiliency Fund: Keep America Beautiful's Community Restoration and Resiliency Fund benefits Keep America Beautiful Affiliates that serve communities directly affected by natural and environmental disasters. The fund provides immediate and long-term support for initial and ongoing cleanup efforts and helps rebuild vital public spaces: parks, greenways, community gateways, main street/downtown areas, open spaces and more.
- United States Tennis Association (USTA) Facility Services Program: The USTA offers business development, advocacy, technical and financial support to improve or construct tennis facilities across the country. In addition, each applicant will be appointed a project consultant from the USTA national staff who will deliver personalized support and service. Service applications are accepted on a rolling basis.
