

CITY OF COCOA
AMENDMENT TO CONTINUING SERVICES AGREEMENT
2nd AMENDMENT
JACOBS ENGINEERING GROUP INC.

This SECOND Amendment to the Continuing Services Agreement entered on February 5, 2020, for engineering, design and permitting services is made between the City of Cocoa and Jacobs Engineering Group Inc.

The Parties desire to amend the Agreement as follows:

- A. The Term is extended through February 4, 2027, as allowable under Section 1.1 of the Agreement for an additional two (2) years, which is the second of two renewal options available.
- B. This Amendment increases the cost limitation in Section 2.5 of the Agreement in accordance with the newly amended Consultants' Competitive Negotiation Act (CCNA). The contractual cost limitations are based on Florida Statutes § 287.055, the CCNA. The Florida Legislature has recently amended the CCNA, increasing the cost limitation effective July 1, 2024. Under the newly amended CCNA, the maximum cost for each individual project procured pursuant to the CCNA has risen to \$7.5 Million, plus an annual increase based on the Consumer Price Index (CPI). Accordingly, Section 2.5 of the Agreement is stricken in its entirety and replaced with the following:

No task in which the Engineer is to provide professional services to the City for a project with an estimated construction cost exceeding the thresholds outlined in the Consultants' Competitive Negotiation Act, Florida Statutes § 287.055, ("CCNA"), may be the subject of a Task Order under this Agreement.

All other terms, conditions, provisions, and scope of services remain unchanged. By signing below, each party indicates its approval of this Second Amendment to the Continuing Services Agreement.
