CITY COUNCIL AGENDA ITEM

Memo Date: August 10, 2023
Agenda Date: September 12, 2023
Prepared By: Donnie Howard, Field Operations Manager
Through: John A. Walsh, P.E., Utilities Director
Requested Action:

To Approve Task Order No. 2024-34 with Jacobs Engineering, Inc. (Jacobs) to Provide Assistance with Project and Asset Management, Contractor Coordination and Documentation, Data Management and Quality Control, and Strategic Planning for Water Field Operations and the Cross-Connection Control Program; Pending Approval of the FY 2024 Budget

BACKGROUND:

Since 2010, the Utilities Department has successfully implemented several proactive infrastructure condition assessment programs including a valve and hydrant assessment & replacement program, Cross-Connection Control (CCC) inspection/testing/replacement program, and pipeline condition assessment projects. These programs have provided comprehensive data critical to the successful implementation of proactive asset management programs managed by the Water Field Operations (WFO) division.

Due to the scope and complexity of these perpetual infrastructure assessment and repair/replacement programs, the Utilities Department has requested that Jacobs Engineering, Inc. (Jacobs) continue to augment City staff in the form of project and asset management assistance, contractor coordination and documentation of activities, data management and quality control assistance (including review of contractor submitted data and invoices), long-term strategic planning,

and safety.

Proposed Task Order No. 2024-34 covers the period from date of October 1, 2023 through September 30, 2024 with the following engineering services:

Task 1 - WFO & CCC Project Management and Asset Management Assistance

Jacobs will provide project management assistance in the form of documentation of asset management activities performed by WFO Staff, assistance with uploading of distribution system improvements to the GIS database, monitoring of existing and new outside vendors/contractors' activities, and collection and transfer of information and data to City personnel and GIS database.

In addition, Jacobs will meet with WFO personnel to review internal field activities including assessments, replacements, and improvements of potable water distribution assets. These meetings will include documentation of information regarding:

1. Recommended replacement/improvements of valves, hydrants, and pipelines, including assets that require further WFO investigations.
2. Which assets might be repaired or replaced by City personnel.
3. Which assets should be replaced by a licensed Contractor.

Task 2 - Cross-Connection Control (CCC) Program (Project WS13BC)

A) Contractor Coordination and Documentation

Jacobs will meet with Water Field Operations (WFO) personnel and the CCC Program Contractor to update progress in surveying, testing, repairing, and replacing commercial and residential backflow devices.

B) Data Management and Quality Control

Jacobs will review Contractor submitted data to verify accuracy and thoroughness and to ensure the proper formatting of data for uploading to the City's GIS database.

C) Strategic Planning

Jacobs will assist City Staff with the continued strategic planning and implementation related to the ongoing regulatory requirements of the CCC Program.

Staff recommends the approval of Jacobs Engineering, Inc Task Order No. 2024-34 in the amount of \$223,524 (pending approval of the FY 2024 budget).
